Aaron Bierman - Principal Hydrogeologist / Owner
Bierman Hydrogeologic
3153 Redwood Drive, Aptos, Ca. 95003
abierman@comcast.net / (831) 334-2237

EDUCATION:

B.A., Earth Sciences (Geology) University of California Santa Cruz, 1994

STATE LICENSE:

Professional Geologist #7490 (May, 2003)
Certified Hydrogeologist #819 (June, 2005)

PROFESSIONAL AFFILIATIONS:

American Water Works Association (AWWA) - 2007
International Association of Hydrogeologist (IAH) - 2008
American Rainwater Catchment Systems Association (ARCOSA) – 2010
American Institute of Professional Geologist (AIPG) - 2017

EXPERIENCE:

A licensed Professional Geologist (PG) / Certified Hydrogeologist (CHg) with significant experience in the hydrogeologic consulting industry based on using hydrogeologic principles, practices and methods.

Mr. Bierman has 24-years of providing hydrogeologic consulting services with expertise in environmental and water resource management, catchment-and-basin size hydrogeologic and long-term sustainable water supply analysis, fractured hardrock structural controlled groundwater flow, anisotropy/delayed yield analysis and, has served as a expert witness in hydrogeologic discrepancies in relation to groundwater resources, well feasibility and/or groundwater quantity & quality.

Between 1995 and 2007, Mr. Bierman worked an environmental geologist (Ogden Environmental: June 1995 to December 1995 and, Weber, Hayes & Associates: January 1996 to April, 2007). During this time, work generally included; plume delineation investigations, installation/monitoring of single and multi-level monitoring well-field networks through single and multiple stratified aquifers for contaminant plume fate/transport and biodegradation analysis; large-scale dewatering projects of contaminated soil/groundwater and; drilling/constructing both horizontal and vertical remediation wells.

In April, 2007, Bierman Hydro-Geo-Logic was founded with work dedicated primarily to hydrogeologic consulting and water resource management, specifically; well siting, well design and aquifer analysis.

Selected ongoing and previous projects and references are attached.
